Flag: Follow up

Hello Green Chemistry workgroup!

I apologize for taking so long to get back to you after the SRRTTF meeting a few weeks ago. Thanks to Vikki for representing us at the meeting when I was sick and providing a summary of the meeting!

Here is Vikki's report:

- The group was good to go with the Green Chemistry plan of working with NW Green Chemistry to develop the article (see attached). The group wanted to include Dr. Heine's credentials in the scope of work. Brian Nickle mentioned that Michelle Mullin was doing a research project on this topic and that she has a virtual intern that might be able to help support sum of these efforts. Chris said that we can bring back this proposal to the group in February for approval to move on this, and there was no need to post the information again.

So, we don't have approval yet because I didn't get the information posted one week in advance of the SRRTTF meeting. I do have a call scheduled with Dr. Heine on Friday morning to talk about a contract with NW Green Chemistry and further refine the scope of work. (She has been researching the pigment issue and holding conversations with folks, including Doug Krapas.)

My question for you is how to proceed on next steps.

- Are you comfortable with me emailing an update of the scope, etc. after my conversation with Dr. Heine, and providing feedback via email; or
- Do you want to have a meeting?

I need to have any updated materials posted for the SRRTTF to consider by Feb. 21st, so unfortunately we would be on another tight schedule. (Sorry about that!)

Switching gears a bit... On the product testing, the Tech Track Work group will be talking about product testing and our deicer survey & testing proposal at 10:00 tomorrow morning – and soliciting other ideas. If you want to participate please visit the link for the call-in or in-person information!

Thanks for providing feedback on next steps!
Karin
